

## **Responsible Minerals Report**

By obtaining 100% of CMRTs (Conflict Minerals Reporting Templates) and CRTs (Cobalt Report Templates) from our primary suppliers who trade raw materials that are supplied to Samsung Electro-Mechanics' manufactured products (MLCCs, camera modules, PCBs, etc.), we are carrying out activities to prevent and rectify issues by reviewing investigation information reliability and the usage of certified smelters as well as through risk analysis, and should any risks be identified in the partner registration process, we are conducting regulatory response activities, such as limiting transaction registrations.

Through such activities, Samsung Electro-Mechanics confirmed that its 3TG (Tantalum, Tin, Tungsten, Gold) and Cobalt were supplied through 100% certified smelters in 2020, and we will carry out the following to continue to allow for the supply of such minerals by eliminating any risk of our usage smelters within the supply chain.

- For all of our smelters, we shall only use certified smelters and immediately induce RMAP (Responsible Minerals Assurance Process) certification for non-certified smelters or ban them to manage responsible minerals within the supply chain.
- Through supply chain due diligence and training, we shall continue to make efforts to encourage the voluntary response of our suppliers against responsible mineral regulations.
- Furthermore, Samsung Electro-Mechanics shall pay great attention not only to unethically mined minerals, but also to human rights violations and environmental destruction, and shall endeavor to ensure the responsible procurement of minerals by its partners.

### **※ Conflict Mineral Investigation Results**

By obtaining 100% of CMRTs (Conflict Minerals Reporting Templates) and CRTs (Cobalt Report Templates) from our primary suppliers who trade raw materials that are supplied to Samsung Electro-Mechanics' manufactured products (MLCCs, camera modules, PCBs, etc.), we are carrying out activities to prevent and rectify issues by reviewing investigation information reliability and the usage of certified smelters as well as through risk analysis, and should any risks be identified in the partner registration process, we are conducting regulatory response activities, such as limiting transaction registrations, resulting in the following results.

1) Usage Smelter Status by Mineral Type within the Supply Chain

(As of end of 2020, Unit: Number of smelters)

<b>Category</b>	<b>Certified smelters</b>	<b>Certification-in-progress smelters</b>	<b>Subtotal</b>	<b>Certification rate (%)</b>
<b>Tantalum</b>	37	-	37	100%
<b>Tin</b>	53	-	53	100%
<b>Tungsten</b>	36	-	36	100%
<b>Gold</b>	101	-	101	100%
<b>Cobalt</b>	23	-	23	100%
<b>Total</b>	250	-	250	100%

2) Usage Smelter Status by Year

<b>Category</b>	<b>Certified smelters</b>	<b>Certification-in-progress smelters</b>	<b>Subtotal</b>	<b>Certification rate (%)</b>
<b>2020</b>	250	-	250	100%
<b>2019</b>	228	-	228	100%
<b>2018</b>	166	-	166	100%

We have confirmed that among the 250 smelters used within our company's supply chain, 100% of them are all certified smelters. (Non-certified smelters not included)

**Attachment: Usage Smelter List (certified smelters and refineries)**
